

Ecully, 15 September 2009

Press Release

**Jean-Paul KOVALEVSKY at the head of
VIBRATEC Group, French leader of
Vibration, Acoustic and Reliability
services**

VIBRATEC, state-of-art Vibration and Acoustic company...

The VIBRATEC Group, whose headquarters are located in ECULLY, France (near Lyons), is a reference concerning research and studies in the fields of Vibration and Acoustics:

- VIBRATEC (package studies for Testing, Measurement, Troubleshooting and Simulation),
- VIBRATEAM (Technical Assistance on-site for clients),
- MICRODB (Antennas and Acoustic Imaging Software).

Founded in 1986 by engineers from the Lyons area, VIBRATEC and its two subsidiaries have continually developed their know-how at their clients' service, working with key accounts in diverse fields: Energy (Oil & Gas, Nuclear Power), Transportation (Automobile, Railway and Aeronautic), Military or Mechanical engineering companies. The VIBRATEC Group currently employs 90 PhD engineers and technicians and has a turnover of 9 M€.

Jean-Paul KOVALEVSKY's arrival marks the beginning of a new stage in VIBRATEC's development, allowing it to preserve its autonomy and strengthen its international position...

After years spent in international industrial management, 52 year-old Jean-Paul KOVALEVSKY, Engineer graduated from the Ecole Polytechnique and the ENSPM, is joining the VIBRATEC Group by acquiring 51% of its capital; the remaining 49 % are held by employees .

VIBRATEC's ambition is to pursue its development in France and to consolidate its international presence, primarily alongside its key European accounts in the energy and transportation fields .

Supported by OSEO INNOVATION, VIBRATEC continues its Research and Development efforts (15% of annual turnover) by following its field's technical evolutions and offering evermore innovative services to its clients to enable them to improve their products' performances. As an independent group, VIBRATEC prides itself as being a preferred partner to industrial companies for all subjects relating to Vibration, Acoustics and Mechanical Reliability .

VIBRATEC Group

3 companies • 90 experts • a complete offer

R&D · Engineering · Simulation · Testing · Troubleshooting · Software · Qualification
